## Lignum Pura

### Invisible wood protection

Extremely matt, non-colouring, single-component wood and parquet lacquer with high resistance to wear. Sustainable water-based, bio-based polyurethane.

Lignum Pura is used mainly to produce invisible, wear-resistant and easy-to-maintain finishes for parquet floors. Its exceptionally natural effect also makes it suitable for many other decorative timber finishes (including doors, furniture, etc.) where the natural character of the wood needs to be retained.

Usage: 10 – 12 m<sup>2</sup> per litre per coat.

- ✓ Invisible;
- ✓ Bio-based;
- ✓ Water-dilutable;
- ✓ Extremely matt, without gloss stripes;
- ✓ Very fast-drying, without overlappings;
- ✓ Can be overcoated after 2 hours;
- ✓ No discolouration of the wood;
- ✓ Easy to use;
- ✓ Resistance to wear comparable to 2K laquers;
- ✓ No unpleasant odour;
- ✓ Easy to maintain.

Decovery®: plant-based resins, a revolutionary technology to replace fossil-based resins with renewable materials, reducing the ecological footprint without compromising product performance.

Decovery is a family of environmentally friendly coating resin solutions with one difference: they are mainly made from plants! As the heart and soul of biobased varnish/lacquer, Decovery literally connects the product and creates healthy floors for people all over the world.
